

Leverage Your CAD Data To Its Full Potential.

Blackpoint is a software solution for homebuilders targeted at managing the countless product options offered.

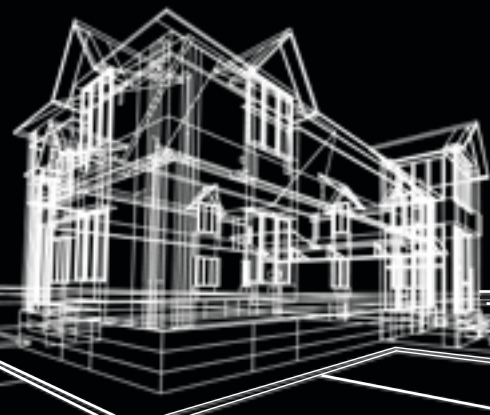

Streamline management of your plan portfolio | Plan reduction without reducing product offering | Reduce wasted drafting time by effectively managing CAD base models and house options | Manage CAD information and estimates from one location | Produce more jobs with fewer resources | Seamless integration with ACA | Wood Wall Framing | Produce drawings and **estimates** that are more accurate with fewer resources | Create **lot specific drawings** directly from your sales order in minutes not hours | Quickly create **option costing** for each and every option | Automatically **mirror CAD drawings**

**STOP
LEAVING
MONEY
ON THE
TABLE.**

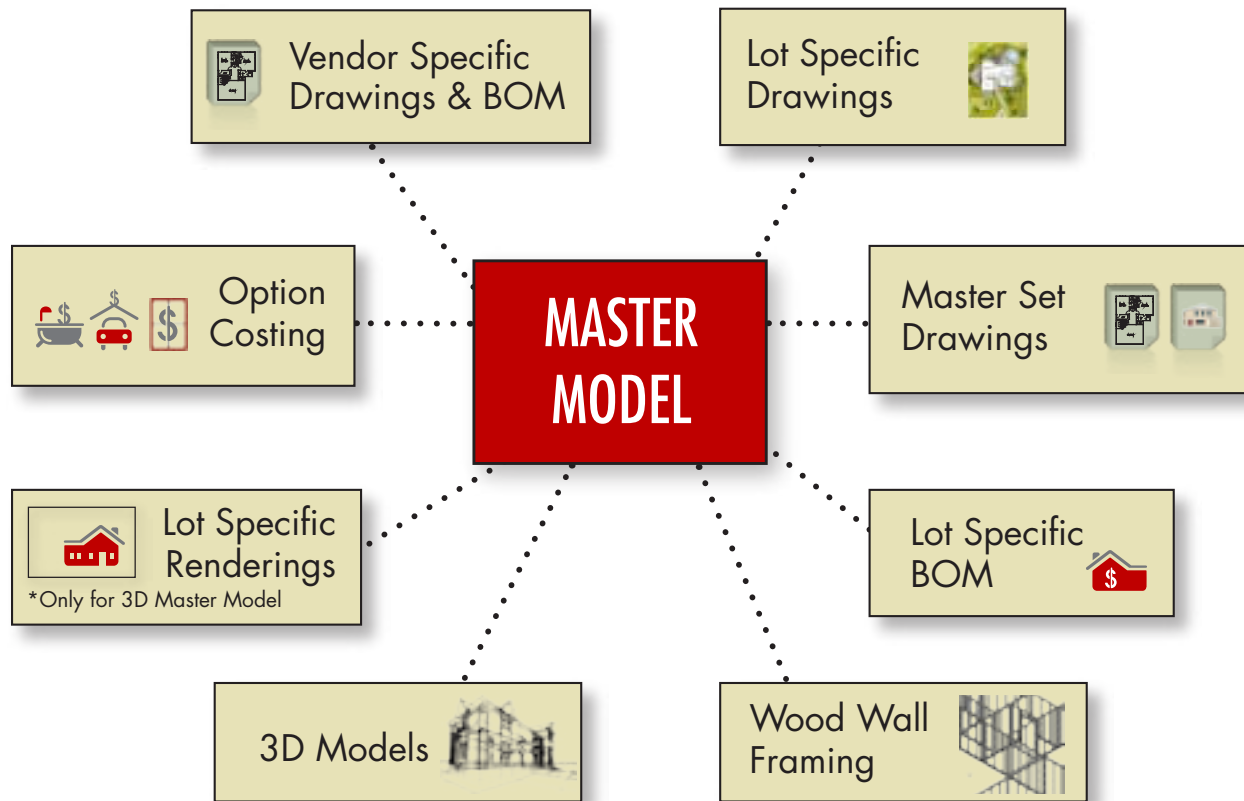

BLACKPOINT

The Ultimate Option Management Tool.

Blackpoint CAD Data Structure Produces Multiple Output Choices from ONE Source

Do You Know?

- How frequently your plans are sent to the field with incorrect information?
- How much it costs to build from incorrect plans?
- How much it costs to produce a master set of drawings?
- How much it costs to maintain your master drawing sets?
- The cost to build all possible combinations of your base plans and options?

If Not, It's Time To Find Out. Stop Leaving Money On The Table and Buy Blackpoint Today.
